Hi Sponsors!

Here's the September newsletter summarising what I have been up to across my GitHub projects, for my GitHub Sponsors. Your support (no matter how big or small) has helped fund and encourage me in this work.

If you see anything below that piques your interest, please don't hesitate to ask more questions or dig into the interactive dataviz projects yourself.

Please share my work across your networks and encourage others to join you in sponsoring my projects.

[covid-19-genomes](#)

- Weekly updates of the data from GISAID and Nextclade continued.
- I continued tracking the emerging variants that are contending to replace the incumbents, eg on this [thread exploring PY.1.1.1, XFY and XFY](#).
- BA.3.2.* samples continue to be reported from Western Australia. Using their wastewater data, I started estimating the weekly infections with this variant, to illustrate the opportunities it is being given to find more successful mutations, most recently on this [thread: BA.3.2.* in Perth](#)

[sars-cov-2-genomes](#)

- Weekly updates of the data from GISAID and Nextclade continued.

[covid-19-au-vaccinations](#)

- Daily scheduled updates of the data from covidlive.com.au and the associated project scraping the NNDSS data continued
- Weekly updates of the data from ADHAC (Aged Care Metrics) continued
- Monthly updates of the data from ABS (Mortality) continued
- The data and visuals I added a few months back to integrate all the diseases on the NNDSS has been very useful, eg to add context to the [progress of Measles in Australia](#), and for a [detailed analysis of Influenza across Australia](#)

[covid-19-world-vaccinations](#)

- Daily scheduled updates of the data from OWID, the WHO and HMD continued
- I used the Excess Deaths Analysis to contrast the stark [differences in outcomes between Australia and the UK](#)

I shared content and analysis from the above projects across various social media channels:
