

March 2026 sponsor update on Mike Honey's GitHub projects Published

Mike-Honey published an update now for

Hi Sponsors!

Here's the March newsletter summarising what I have been up to across my GitHub projects, for my GitHub Sponsors. Your support (no matter how big or small) has helped fund and encourage me in this work.

If you see anything below that piques your interest, please don't hesitate to ask more questions or dig into the interactive dataviz projects yourself.

Please share my work across your networks and encourage others to join you in sponsoring my projects.

[covid-19-genomes](#)

- After several Variant Hunters noticed that BA.3.2.* "Cicada" is preferentially infecting children, I integrated the (super-messy) [Patient age data and presented it on a new "by Age" page](#). Hopefully this helps support informed discussion on this important topic, and also saves those trying to analyse a ton of time on data integration.
- Weekly updates of the data from GISAID and Nextclade continued.

[sars-cov-2-genomes](#)

- Weekly updates of the data from GISAID and Nextclade continued.
- Next month I will copy across the Patient age data integration and visualisation from the dataviz project above

[covid-19-au-vaccinations](#)

- I used this project to inform a round-up of the [measles situation across Australia, especially in NSW where a major outbreak is continuing](#)
- This project supports a regular report on COVID-19 case statistics for Australia. I refined that a bit and shared an update as [the new wave became clear in several](#)

[states](#)

- Daily scheduled updates of the data from covidlive.com.au and the associated project scraping the NNDSS data continued
- Monthly updates of the data from ABS (Mortality) continued

[covid-19-world-vaccinations](#)

- Updates of the data from OWID, the WHO and HMD continued
- The HMD data integration became slightly more complex – I now have to sign in, download their file and upload it to my SharePoint site.

I shared content and analysis from the above projects across various social media channels:

- Mastodon (Aus.Social): https://aus.social/@mike_honey_
- BlueSky: <https://bsky.app/profile/mikehoney.bsky.social>
- Insta: https://www.instagram.com/mike_honey__/
- Threads: https://www.threads.net/@mike_honey_
- Reddit: https://www.reddit.com/user/mike_honey/submitted/
- YouTube: <https://www.youtube.com/channel/UCNelxLSC010bulYuwDFBaYg/>
- TikTok: https://www.tiktok.com/@mike_honey_

That's it for last month; quite a busy one for me!

Sincere thanks

Mike Honey
