

June 2026 sponsor update on Mike Honey's GitHub projects Published

Mike-Honey published an update now for

Hi Sponsors!

Here's the June newsletter summarising what I have been up to across my GitHub projects, for my GitHub Sponsors. Your support (no matter how big or small) has helped fund and encourage me in this work.

If you see anything below that piques your interest, please don't hesitate to ask more questions or dig into the interactive dataviz projects yourself.

Please share my work across your networks and encourage others to join you in sponsoring my projects.

[Ebola outbreak 2026](#)

- I came across a dynamic project which has been gathering detailed data on the current Ebola outbreak. So I built a new dataviz project, to integrate some of the data and show some new perspectives. Here's my [introduction thread for this project](#)

[covid-19-genomes](#)

- Weekly updates of the data from GISAID and Nextclade continued.
- I've been using this project to track new & emerging variants – here's my [latest thread](#)

[sars-cov-2-genomes](#)

- Weekly updates of the data from GISAID and Nextclade continued.
- The mutation scatter chart in this project has been useful to highlight mutations that are growing strongly, in this post I [highlighted Spike D420N](#)

[covid-19-au-vaccinations](#)

- I used this project for updates on the wild [diphtheria outbreak in Australia, especially in the NT & WA](#)
- Daily scheduled updates of the data from covidlive.com.au and the associated project scraping the NNDSS data continued
- Monthly updates of the data from ABS (Mortality) continued

[covid-19-world-vaccinations](#)

- Daily scheduled updates of the data from OWID, the WHO and HMD continued

I shared content and analysis from the above projects across various social media channels:
